

FactPages – «What's New»

2026-09-02

Updated page and table views:

- The production facility name is now displayed as a clickable link.

New table view:

- *Facility history*: Includes historical data for facility name changes, facility kind, fixed/movable designation, surface/subsurface designation, field/TUF affiliation, phases and positions.

Updated table view:

- *CO2 Storage* → *Licences* → *Overview*: Added *Active* status to the table view.

Updated data service:

- See [FactMaps release notes](#).

2026-06-03

Updated page views:

- *Facility*: Phase (operational status) for facilities now included in page view for fixed and moveable facilities.

Updated table views:

- *Facility*: Fixed facility table view now includes columns *date removed* and *date shutdown*.

Bug fixes:

- *Wellbore*: Fixed broken *drilling facility* links.

Updated data service:

- See [FactMaps release notes](#).

2026-04-08

Updated page views:

- *Discovery*: A discovery reporting resources from itself and from at least one other discovery will now display this information in a new section titled *Includes resources from*.

Updated table views:

- New table view *Reporting resources*, showing list of discoveries reporting their own resources and, where applicable, resources from other discoveries.

Updated data service:

- See [FactMaps release notes](#).

2025-11-26

Updated front page:

- CO2 shortcuts on front page now link to relevant locations under *CO2 storage* menu item.
- Added new shortcut to *CO2 injection* table on front page.

Updates table/page views:

- CO2 views (licences/wellbores) no longer available under BAA menu item. (Available under *CO2 Storage*).
- Wellbore:
 - o Bug fix: *Wellbore name, part 6 (wlbNamePart6)* now shows correct data.
 - o Changes relating to drilling target production licences:
 - Column *wlbLicenceTargetName* (Production licence of drilling target) now shows relevant licence even if target licence is the same as the production licence at the well head.
 - Value was previously blank in the case of well head and target production licences being the same.
 - Descriptions and column headings changed to clearly distinguish between production licence at well head and production licence of drilling target.
 - Links to target licence FactPages added.
 - Column *wlbLicensingActivity* (licencing activity (round/APA) of the production licence) now refers to the licencing activity of the wellbore target production licence (as opposed to previously referring to production licence at the well head).
 - Drill permit page view now shows licencees, operators and areas of the production licence of the wellbore target (on the relevant drill permit date) (as opposed to previously referring to data relevant for the production licence at the well head).
- Field:
 - o *Reserves* table view now shows historical values.

2025-09-25

Note: Please review the FactMaps release notes for tag updates and other changes that may also impact FactPages.

New/updated table views:

- CO2 injection table is now available under *CO2 storage*. This table shows monthly CO2 volumes injected per licence and per well.
- New table *Blocks*, showing blocks and licences per field, now available as a table view under menu item *Field*.
- Tag changes in certain tables. See FactMaps release notes.

New/updated page views:

- Predrill entry and completion dates now available for *exploration* and *other wellbores*.
- In the menu structure, *Wellbore* → *Page View* → *Development* → *Drilling*, menu item *Drilling* has been changed to *Ongoing activity*.
- *Development wellbores* with status *ONLINE/OPERATIONAL* where drilling has not been reported as complete, can now be found under *Ongoing activity* (formerly menu item *Drilling*, see previous bullet point).

2025-05-27

Note: Please review the FactMaps release notes for tag updates and other changes that may also impact FactPages.

CO2 storage:

- Data related to CO2 storage (Licences and Wellbores) can now be found in its own tab (in the top-level menu).

Licence/wellbore:

- Adjusted column headings and attribute descriptions.

2025-03-20

Note: Please review the FactMaps release notes for tag updates and other changes that may also impact FactPages.

New data service:

- A new data service is now available through Sodir's REST API. The API data service is intended to replace the current FactPages data download options, so we encourage users of scheduled FactPage data downloads to test the new data service and make an early transition to the new service. The data service contains all our public data. Feedback is welcome at factweb@sodir.no. The data service will be available at <https://factmaps.sodir.no/api/rest/services/DataService/data> with metadata available at <https://factmaps.sodir.no/api/rest/services/DataService/metadata>

Updated page views:

- Maps now visible for wellbores categorized as type *other*.
- *Status* column now visible for all wellbore types on *field* and *licence* page views.
- *Content* column now visible for development wellbores on *licence* page views.

2025.01.29

Note: Please review the FactMaps release notes for tag updates and other changes that may also impact FactPages.

Bugfixes:

- Removed duplicated text in **wellbore** attribute description
- Fixed an issue where some links between page views for **wellbores** reclassified from *exploration* to *development* were faulty

Updated page views:

- All **discovery**, **field** and **licence** page views now exclude wellbores never drilled (no listed entry date) from their respective wellbore sections
- **Licence** — If a production licence:
 - o was partitioned from, or
 - o is additional acreage to
 another licence, this information now appears in the *general information* section of the licence's page view

Updated table views:

- **Licence** overview table now includes information about licences that are
 - o partitioned from, or
 - o additional acreage to
 other licences

2024.10.01

Bugfixes:

- Corrected issue where stated file size units meant file size was incorrect by a factor of 1000
- Now consistently using the correct acronym for *carbon capture and storage* (CCS)
- Corrected **wellbore** page view sorting

Updated page views:

- **Wellbore** page views now show row *Production licence for drilling target* in cases where the wellbore's end point is located in a different licence than the starting point.
- **Discovery** page views now show row *Recources included in* in cases where the discovery's resources are included in a "parent" discovery.
- **Field**: *Owner*, *operator* and *licensee* history added to page views for fields

New table views:

- **Survey**: For survey categories *seismic*, *electromagnetic* and *other*, new table views have been added for survey with statuses *pending*, *paused* and *finished*

Updated table views:

- **Licence:** Added column *Main area*, displaying the relevant marginal sea, to the table *Licence*→*Table view*→*Work obligations/conditions* (tag: *prlMainArea*)
- **Survey:** Column *Legal basis* added to table *Survey*→*Table view*→*Overview surveys* (tag: *seaLawCategory*)
- **Company:** Added eight columns stating companies' roles as current/former operators/partners of *Transportation and Utilization Facilities* (TUF) and *Business Arrangement Areas* (BAA). (tags: *cmpTufOperCurrent*, *cmpTufOperFormer*, *cmpTufPartnerCurrent*, *cmpTufPartnerFormer*, *cmpBsnsArrAreaOperCurrent*, *cmpBsnsArrAreaOperFormer*, *cmpBsnsArrAreaPartnerCurrent*, *cmpBsnsArrAreaPartnerFormer*)
