

Chronostratigraphy of studied wells and boreholes

(Please note that well and borehole numbers and columns are linked to descriptions and figures)

Diagram/Fig. 2: Chronostratigraphy of studied wells and boreholes. All depths are in metres below rig floor, except for the boreholes 6704/12-GB1 and 6403/5-GB1 and the core 49-23 which are in metres below mean sea level. The onshore Hjøllund and Rødding boreholes and the outcrop at Sarsbukta (Forlandsundet, Spitsbergen) in figure 1 are not included in this figure.
