

Data source overview: Relationship between FactPages and Data Service tables

Note: The data sources for FactPages and the Norwegian Offshore Directorate's DataService are the same, as shown in the table below. However, FactPages may have filters applied, which can limit the number of rows returned compared to the output from the DataService.

For help reproducing FactPages output using the DataService, scroll down to the query table on the following page.

FactPages menu item	FactPages breadcrumb	FactPages URL	Attribute descriptions	Data Service table	DataService ID	DataService URL

Data Service queries that reproduce FactPages output

Note: This list is intended to help users recreate FactPages output using NODs DataService. The table of queries is not exhaustive. Other FactPages tables may have filters applied, even if they are not listed below.

FactPages menu item	FactPages breadcrumb	Data Service query that will reproduce FactPages output	Data Service table	Data Service ID	Data Service URL
