

Resource Report for Discoveries and Fields 2019

27 September

More than half left

- Undiscovered resources
- Contingent resources
- Reserves
- Sold and delivered

Significant resources in fields

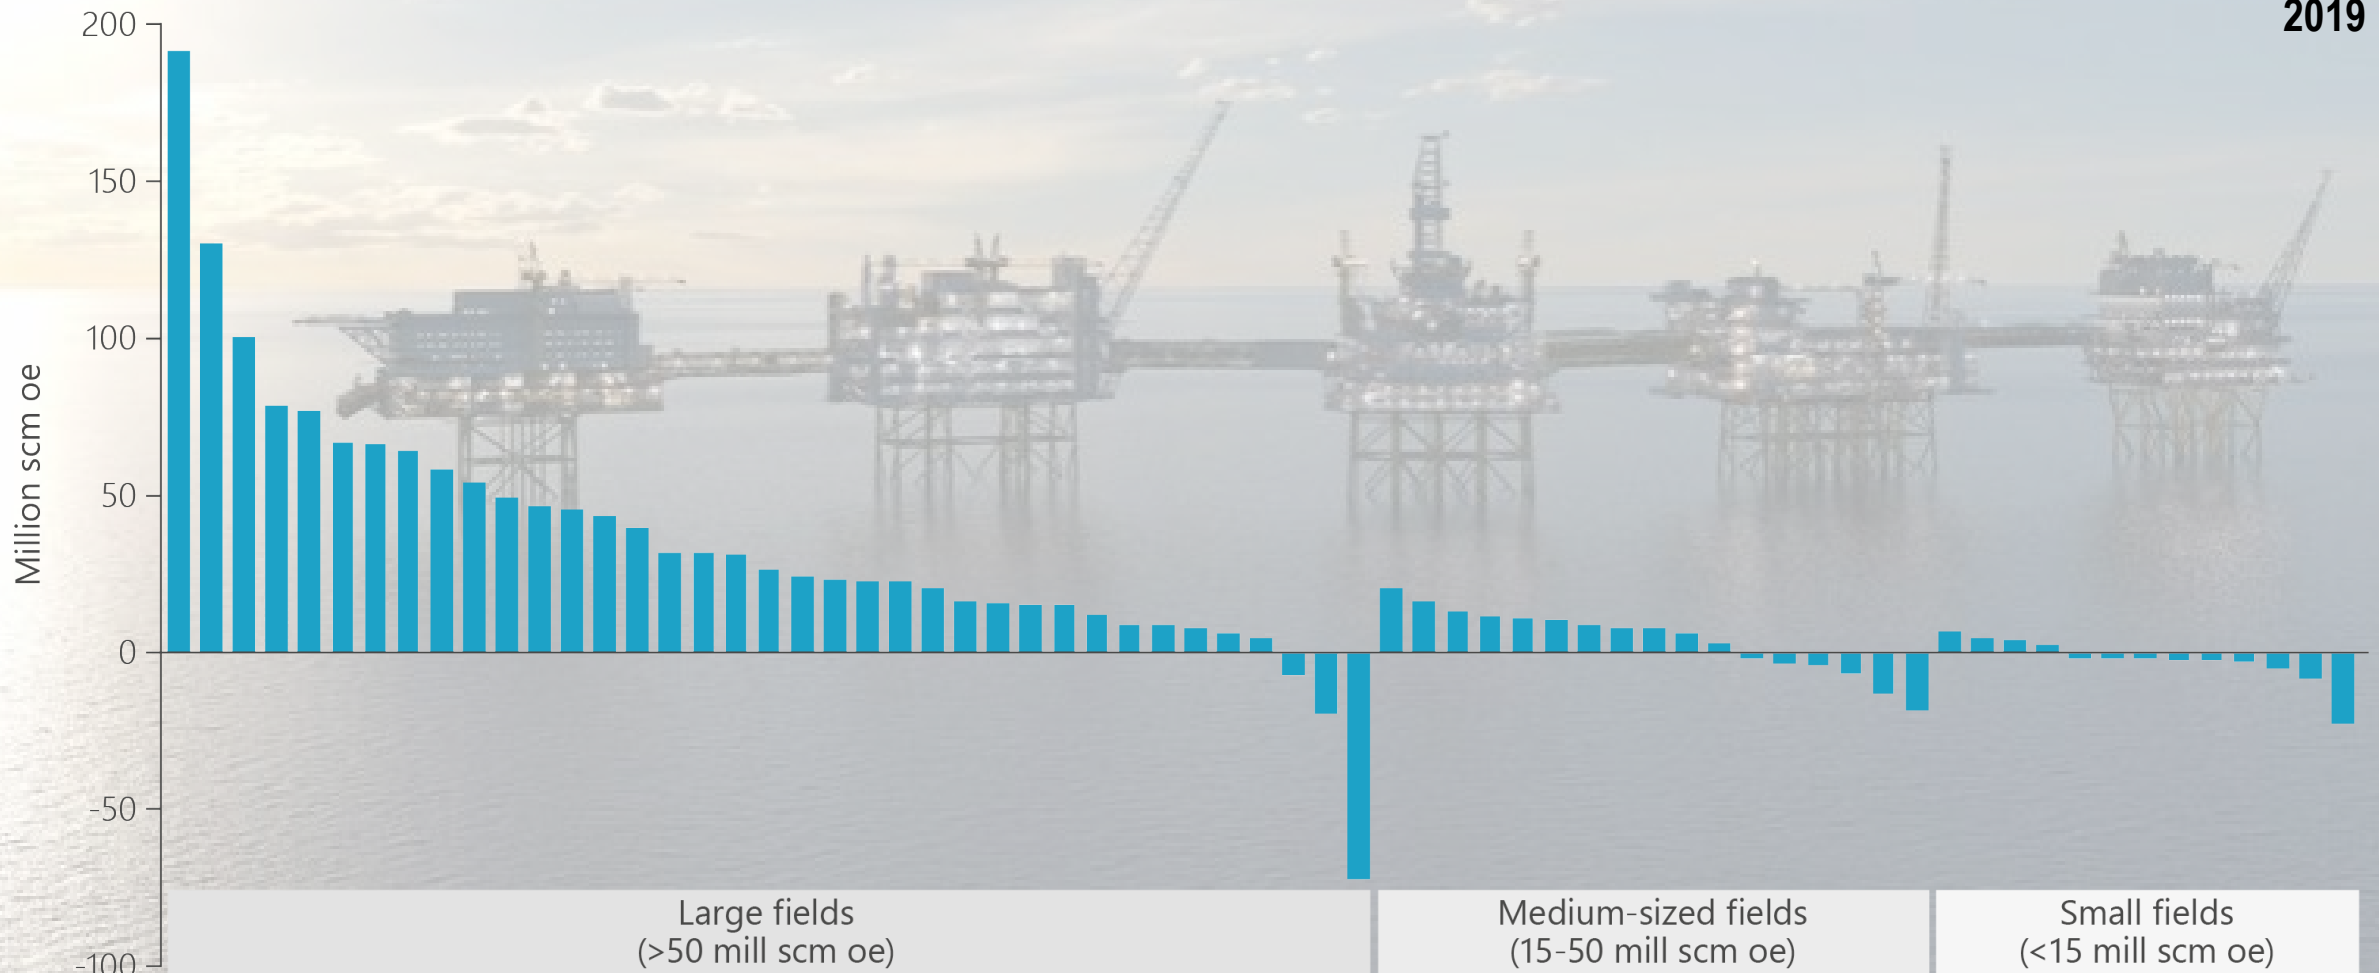

Resource
Report
2019

Increasing reserves – Johan Sverdrup x 3

Resource
Report
2019

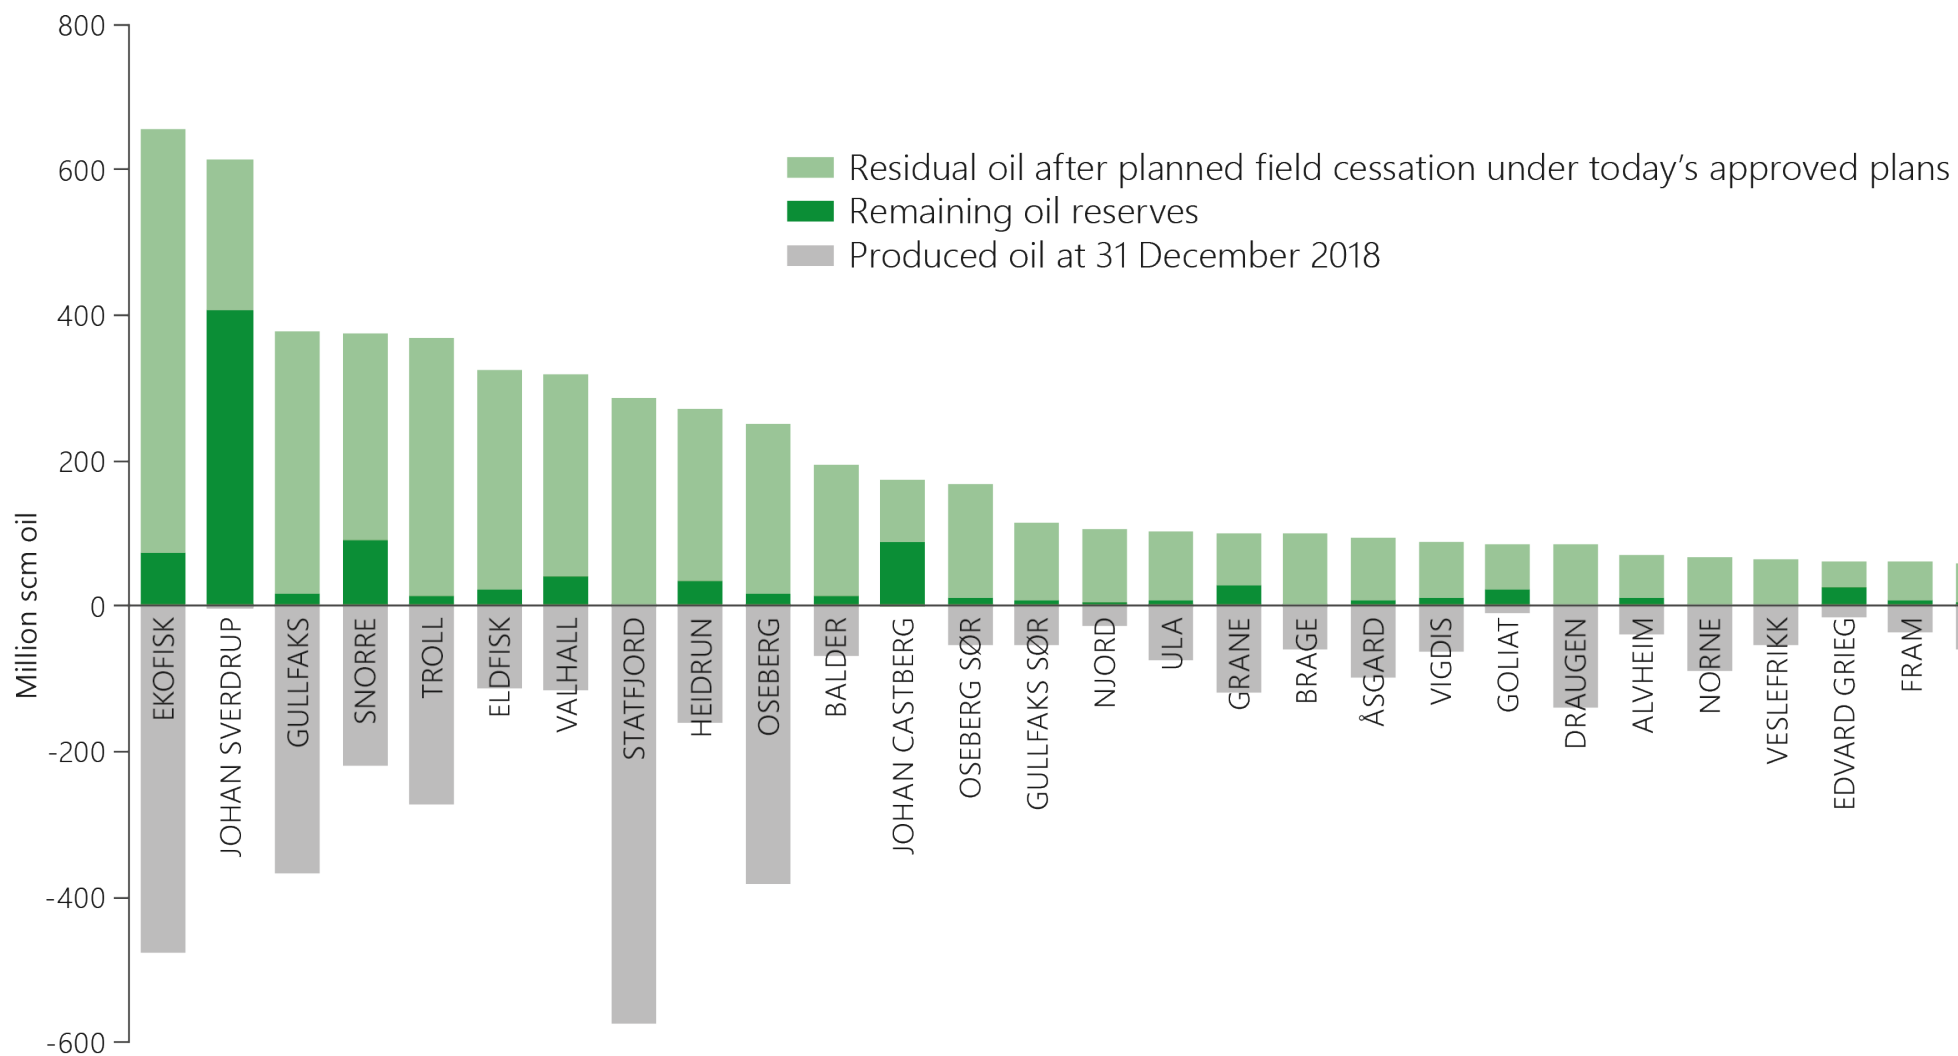

New reserves in old fields

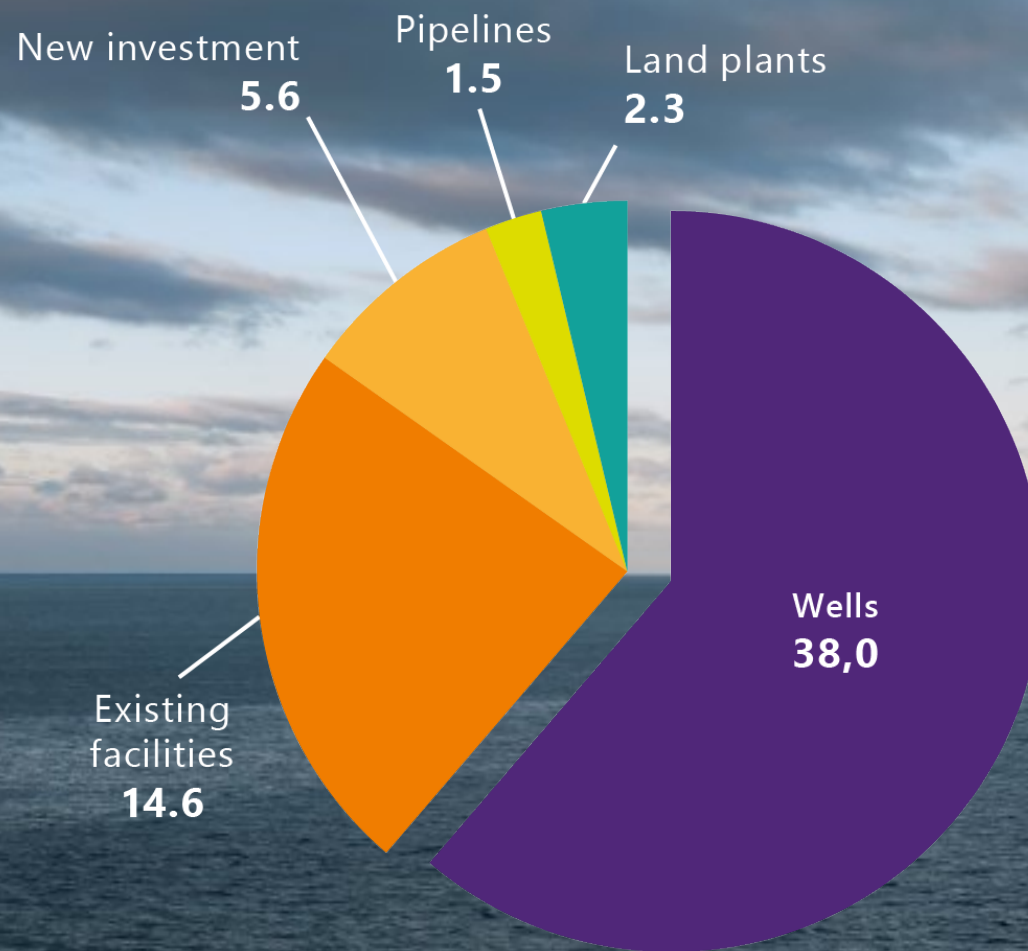

Resource
Report
2019

All socio-economically profitable resources should be produced

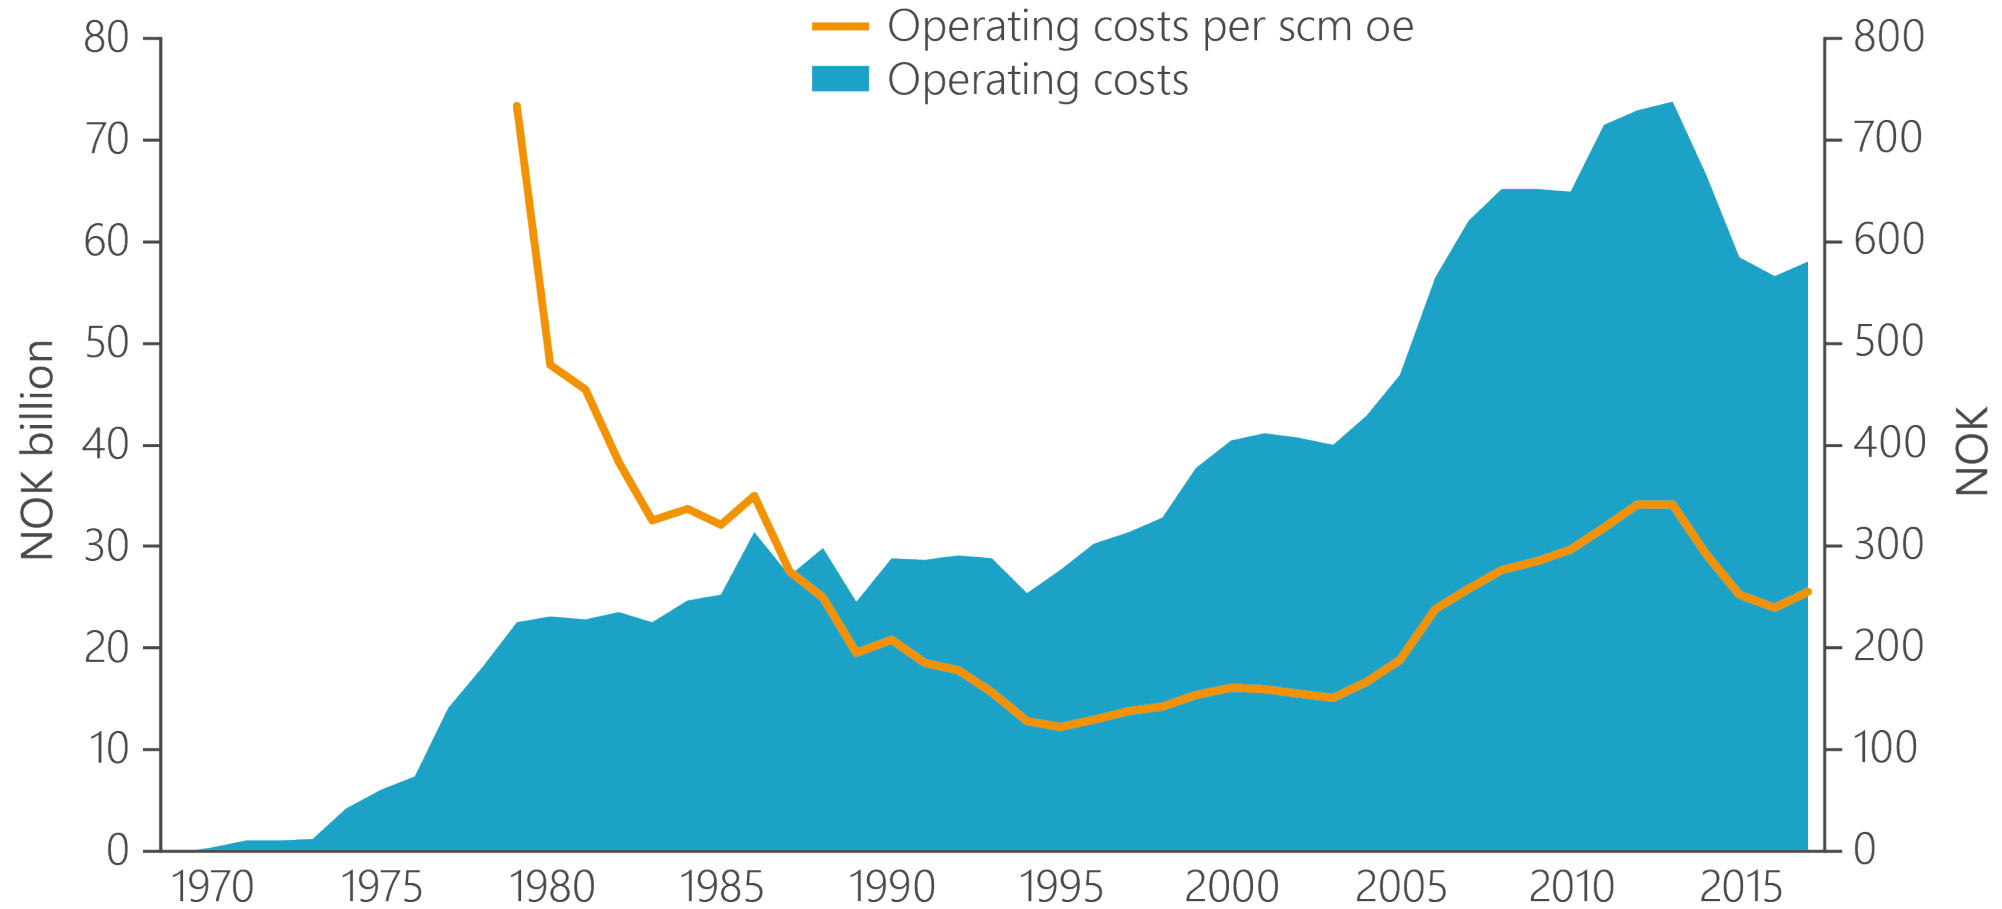

Wells are the most important measure for improved recovery

Figures are
in billion
2018-kroner

Operating costs are down

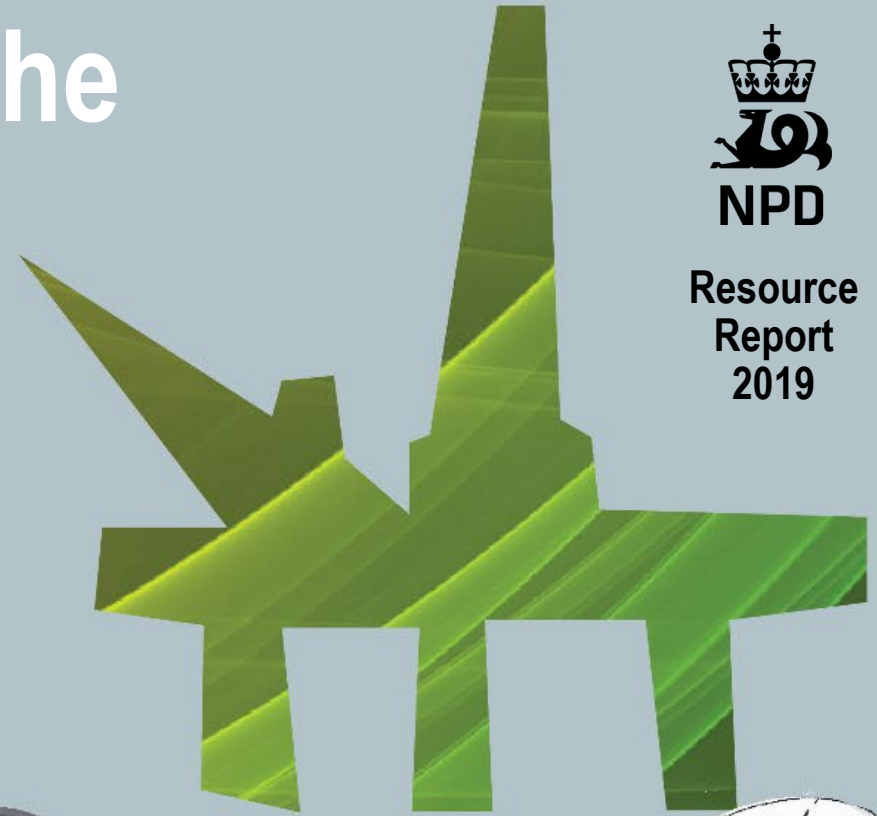

Data provides new opportunities

Significant opportunities in the discovery portfolio

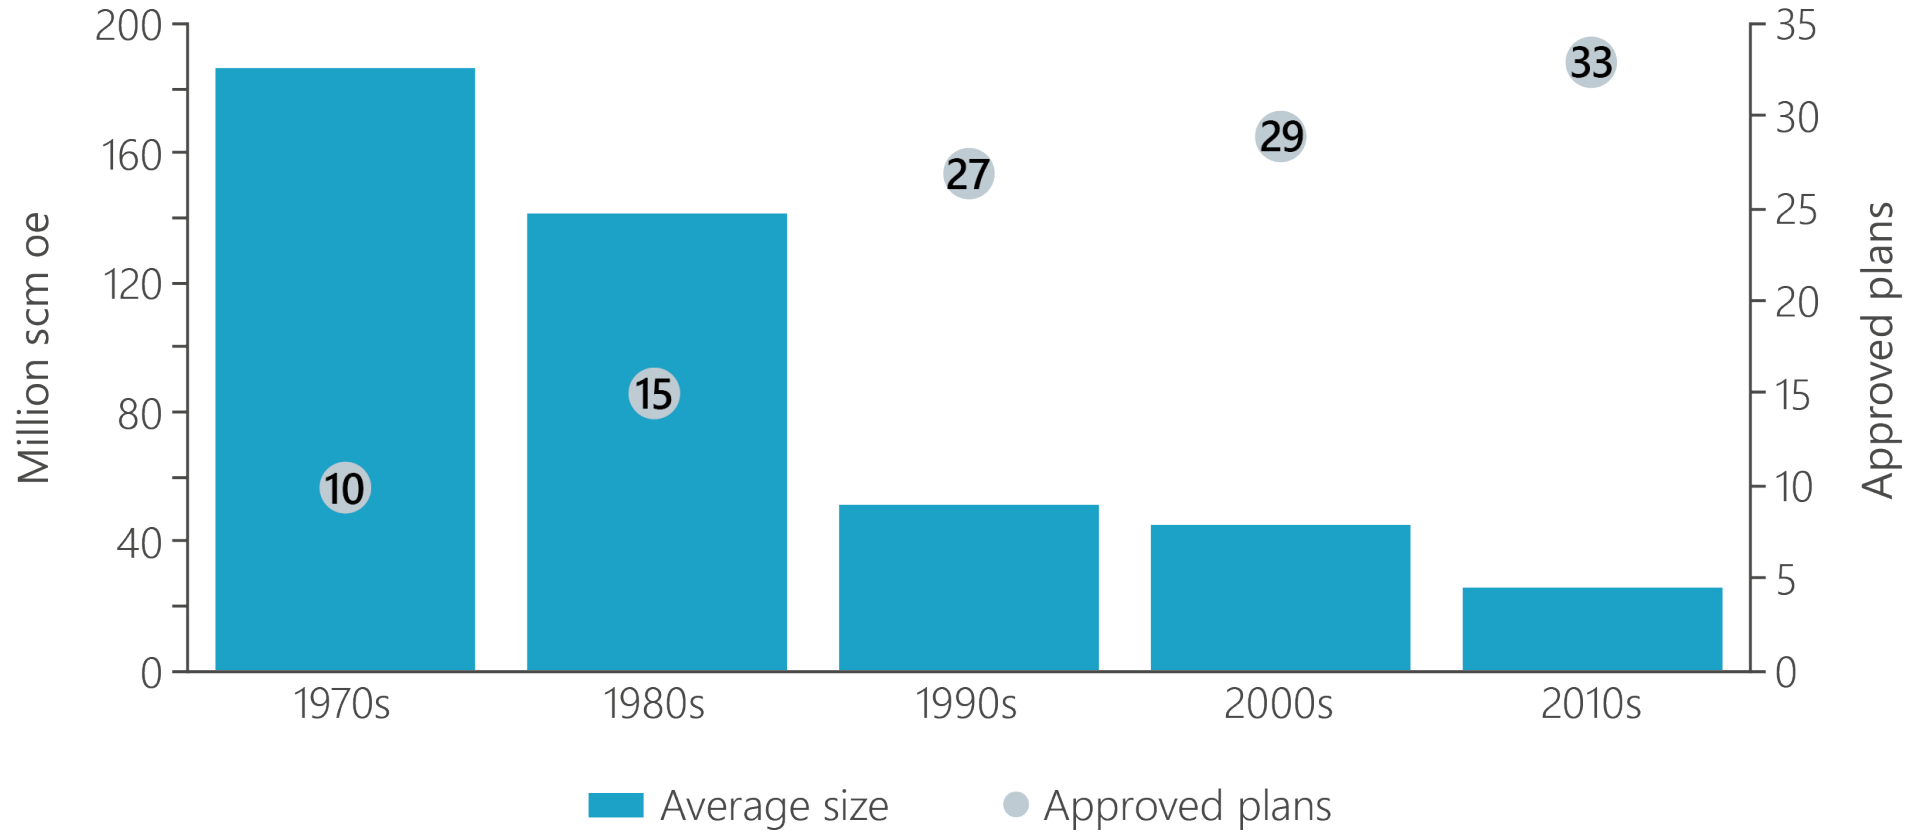

**Resource
Report
2019**

Profitable development of smaller discoveries

Resource
Report
2019

Many discoveries – many possibilities

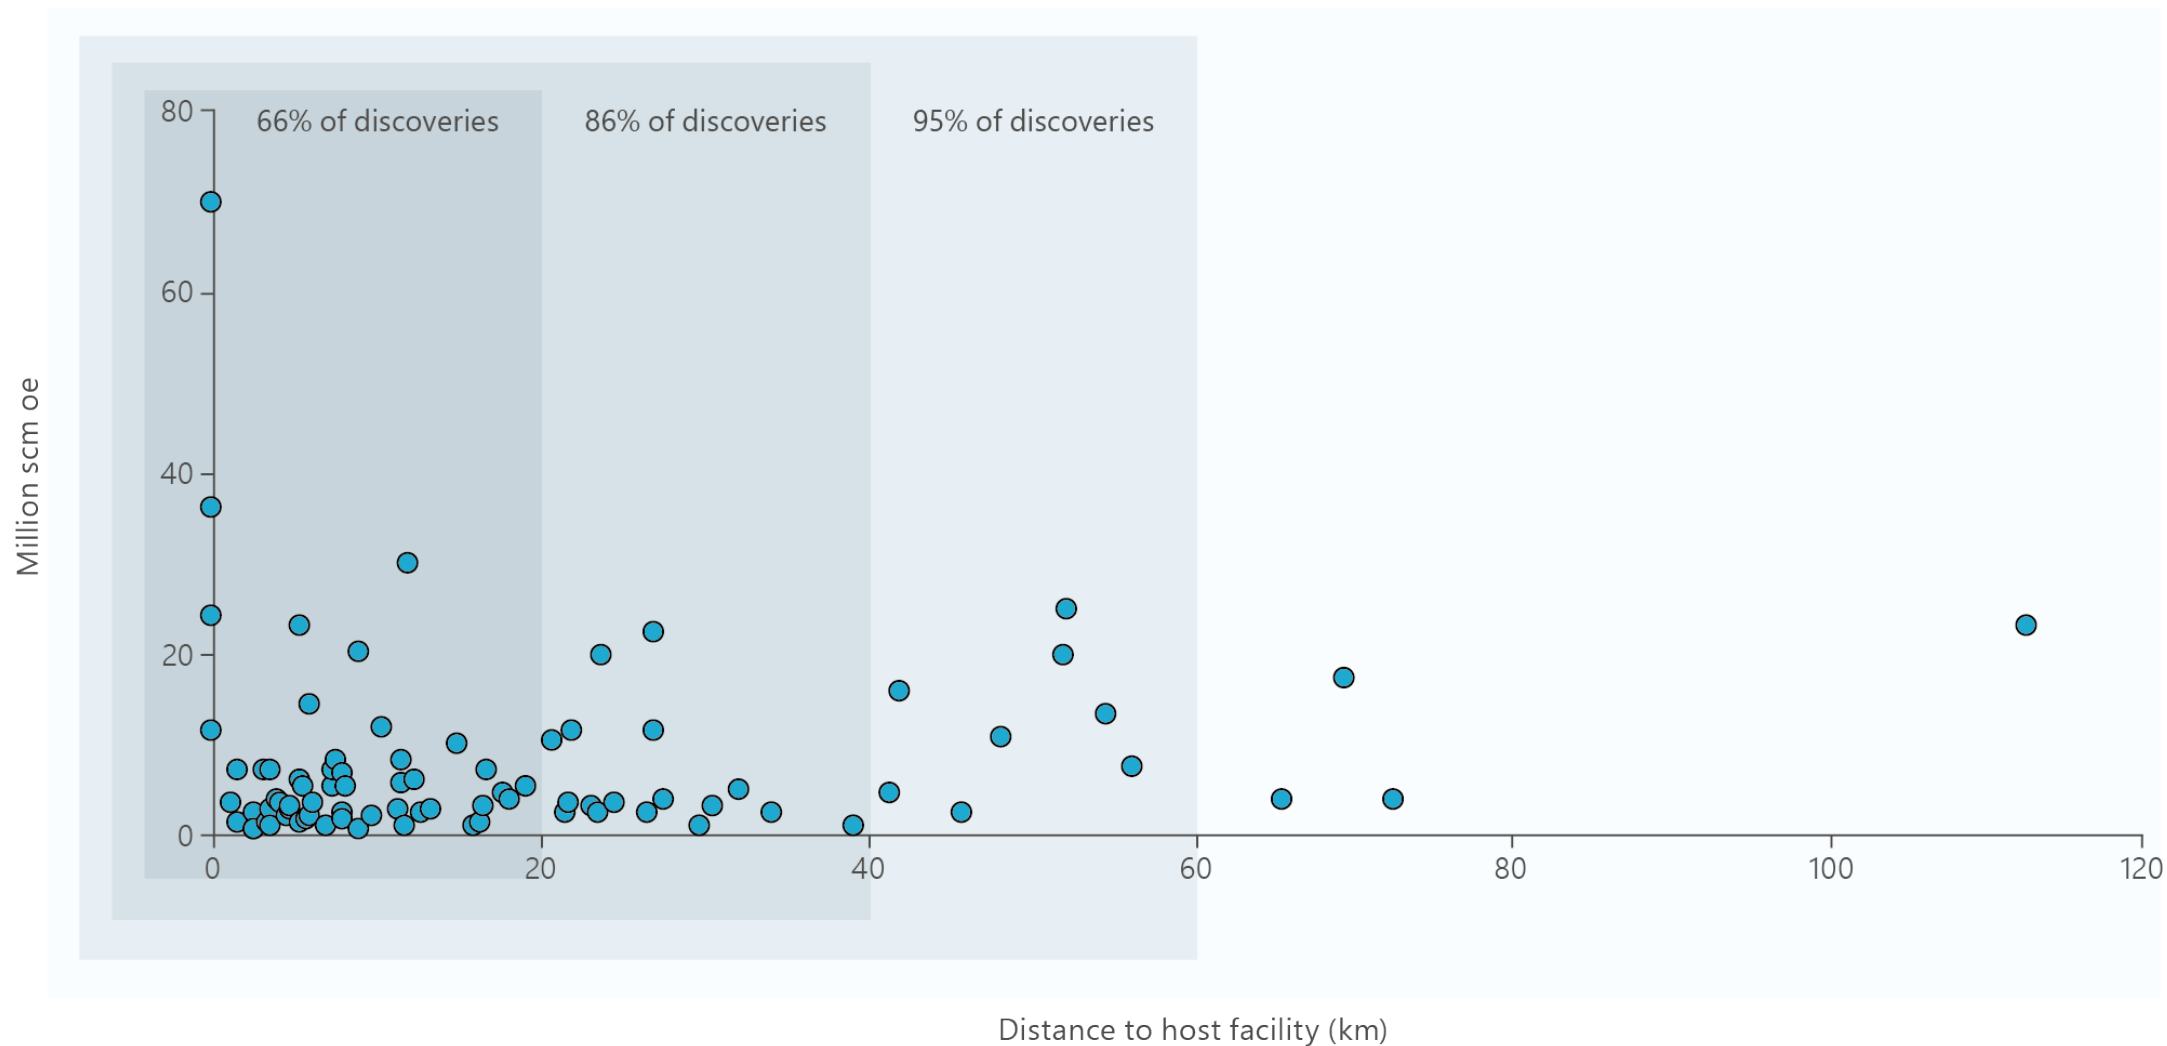

Resource
Report
2019

Phase-ins are the future – use of existing infrastructure is key

Resource
Report
2019

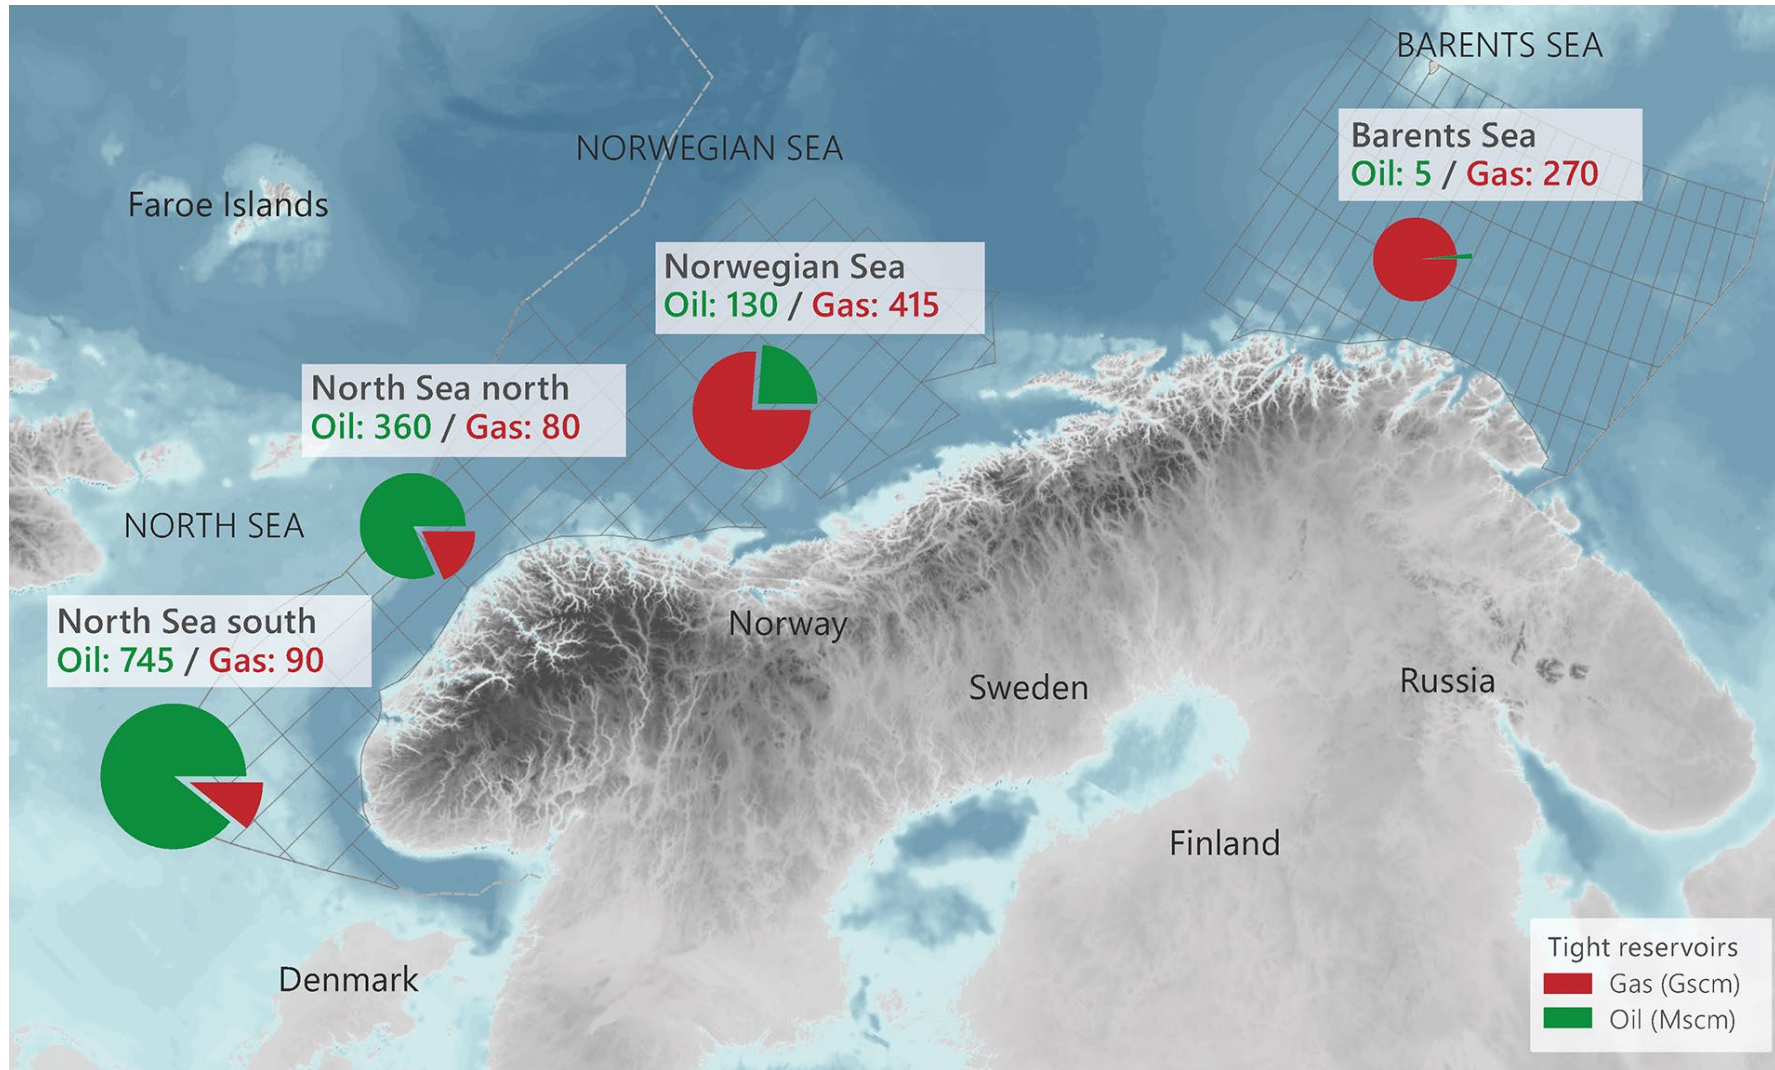

The challenging barrels

Resource
Report
2019

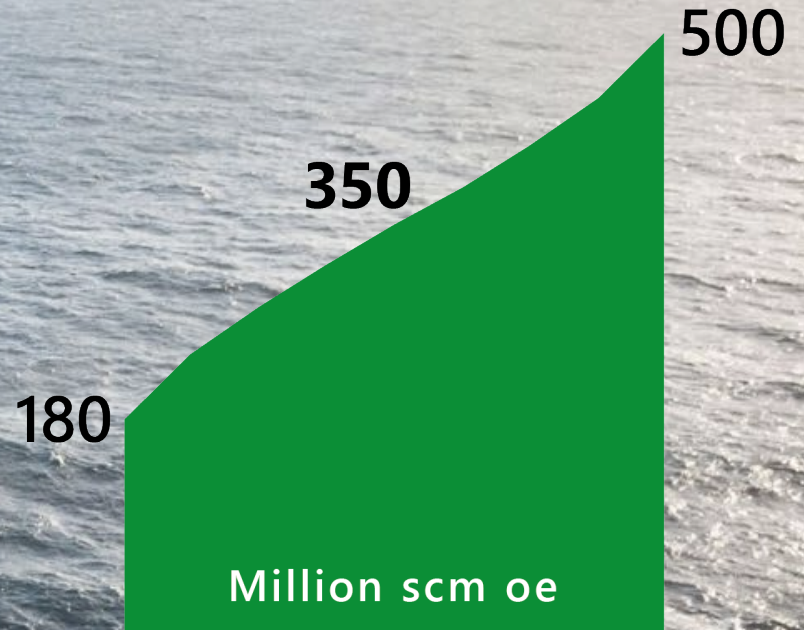

A lot of oil and gas in tight reservoirs

A significant EOR potential

Resource
Report
2019

Now is the time for field pilot tests

Resource
Report
2019

Emissions and environment

Resource
Report
2019

Production is increasing, emissions are holding steady

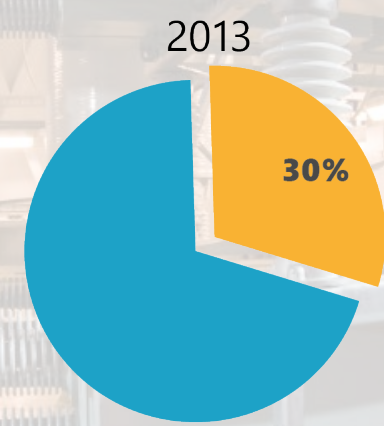

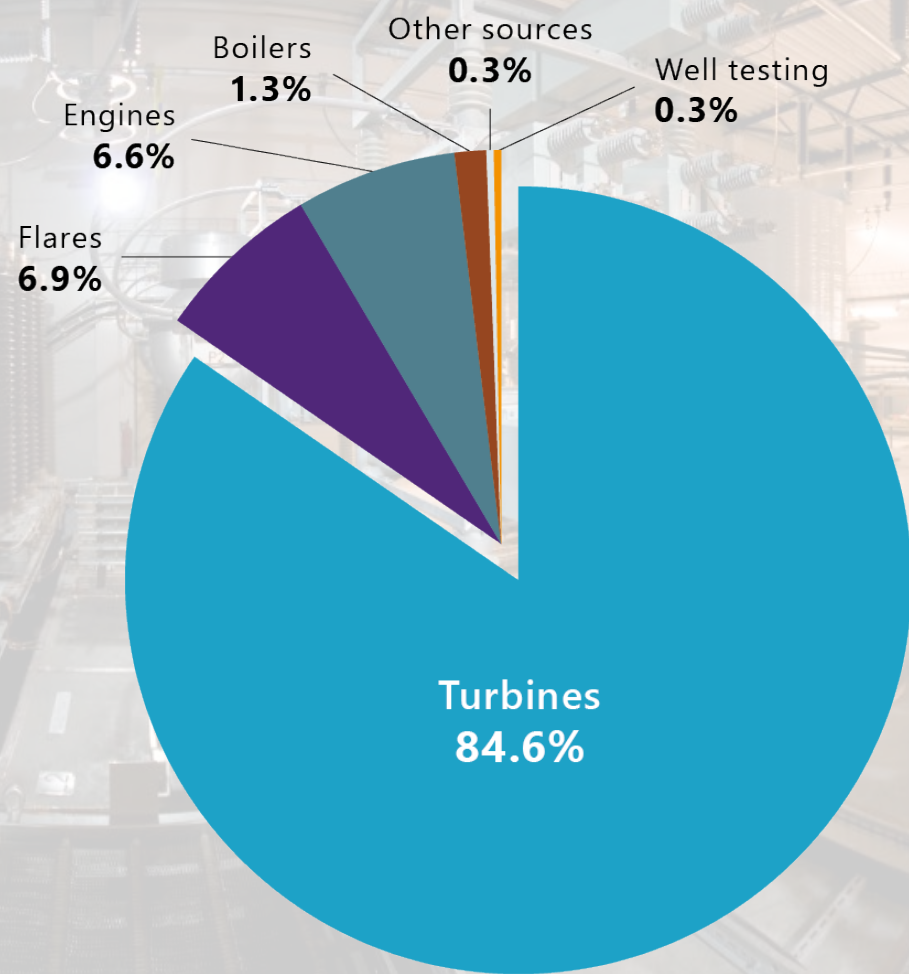

Resource
Report
2019

Turbine operation is the largest emission source

Resource Report 2019

■ Share of production with own power generation
■ Share of production with power from shore
